

Project Initialization and Planning Phase

Date	30 September 2026
Team ID	SWTID-2026-5283
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An IT support agent handling Incident records.	Enter complete and accurate Incident information.	Some important fields may be left empty or entered incorrectly.	The Incident form does not always enforce the required field behavior.	Frustrated and concerned about incomplete Incident records.
PS-2	A ServiceNow Incident user.	View only the fields relevant to the current Incident.	Unnecessary fields may remain visible on the form.	Field visibility is not dynamically controlled based on conditions.	Confused while entering Incident details.
PS-3	An IT support agent updating an Incident.	Update Incident information correctly.	Some fields can be modified when they should be protected.	Appropriate read-only controls are not applied automatically.	Concerned about accidental changes to Incident data.
PS-4	An IT support agent submitting an Incident.	Submit a complete and valid Incident form.	Invalid or incomplete information may be submitted.	Proper clientside validation is not always applied.	Worried about incorrect Incident records.
