

Data Flow Diagram

Date	30 September 2026
Team ID	SWTID-2026-5283
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A User or Incident Reporter who interacts with the Incident Management system to create, update, or view incident information.
Rectangle with numbered header	Process	An activity that processes incident data, such as Create Incident, Validate Incident Details, Apply Client Script, Apply UI Policy, and Submit Incident.
Rectangle (solid fill, no number)	Data Store	A place where incident information is stored, such as the Incident Database / Incident Table.

Labeled arrow	Data Flow	The movement of data between the user, incident processes, and incident database, such as Incident Details, Field Values, Validation Results, and Updated Incident Information..
----------------------	------------------	---

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
