

Demonstration of Proposed Features

Date	30 September 2026
Team ID	SWTID-2026-5283
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Auto-Populate on Form Load (onLoad Client Script)	Client script runs when the Incident form loads to set default values (e.g. caller/contact type) and show a helpful info message to the user.	Implemented	Yes	Verified on new Incident form.
2	Dependent Field Logic (onChange Client Script)	Client script triggers when Category / Impact / Urgency changes to update related fields and display guidance messages.	Implemented	Yes	Works on field change without page reload.
3	Submission Validation (onSubmit Client Script)	Validates key fields (e.g. Short description, Resolution details) before save and blocks submission with an error message if invalid.	Implemented	Yes	Alert shown for invalid entries.
4	Mandatory Fields (UI Policy)	UI Policy makes fields such as Close notes / Close code mandatory when the Incident State is set to Resolved or Closed.	Implemented	Yes	Mandatory indicator appears dynamically.
5	Show / Hide & Read-Only Fields (UI Policy)	UI Policy actions control field visibility and read-only behaviour on the Incident form based on defined conditions.	Implemented	Yes	Tested for multiple conditions.
6	Testing & Validation on Incident Form	End-to-end testing of all client scripts and UI policies on the Incident table to confirm expected behaviour in the form UI.	Implemented	Yes	All test cases passed.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
