

## Project Demo Planning

|                      |                                                |
|----------------------|------------------------------------------------|
| <b>Date</b>          | 30 September 2026                              |
| <b>Team ID</b>       | SWTID-2026-5283                                |
| <b>Project Name</b>  | Implement Client Script & UI Policy (Incident) |
| <b>Maximum Marks</b> | 1 Mark                                         |

### Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

| S.No | Demo Section                     | Description                                                                                                        | Duration (mins) | Responsible Member |
|------|----------------------------------|--------------------------------------------------------------------------------------------------------------------|-----------------|--------------------|
| 1    | Introduction & Problem Statement | Introduce the project and explain the problem: manual, error-prone data entry on the ServiceNow Incident form.     | 1               | Team Member 1      |
| 2    | Solution Overview                | Explain the approach: Client Scripts and UI Policies on the Incident table, plus tools and environment used.       | 2               | Team Member 2      |
| 3    | Client Script Demonstration      | Show the Client Script running on the Incident form (onLoad / onChange) with validation and alert behavior.        | 2               | Team Member 3      |
| 4    | UI Policy Demonstration          | Show the UI Policy making fields mandatory, read-only or hidden based on conditions such as Category and Priority. | 2               | Team Member 4      |
| 5    | Testing & Validation             | Run test cases to confirm scripts and policies behave correctly and do not conflict with each other.               | 1               | Team Member 5      |
| 6    | Conclusion & Q&A                 | Summarise outcomes and benefits, then answer questions from the evaluators.                                        | 2               | All Team Members   |

### Demo Flow Summary:

| Step | Activity                         | Notes                                                                                    |
|------|----------------------------------|------------------------------------------------------------------------------------------|
| 1    | Introduction & Problem Statement | Present the team, project title and the Incident form data-quality problem being solved. |
| 2    | Solution Overview                | Outline how Client Scripts and UI Policies work together to improve the Incident form.   |
| 3    | Live Feature Demonstration       | Demonstrate the Client Script and UI Policy behavior live, then show test results.       |
| 4    | Q&A Session                      | Answer evaluator questions and wrap up with key takeaways.                               |
